Standard Features

Hitches: 30,000# gooseneck hitch and class IV receiver hitch

Structural: Steel welded subframe and hitch components.

Paint Process: Steel subframe goes through abrasive blasting cabinet, acid etching, zinc powdercoat primer and premium black powder coating process. Black is the only color available.

Bed Construction: 3/16" bright aluminum treadplate deck, skirting and formed headache rack. Aluminum channel crossmembers.

Electrical: 6 LED stop, turn, tail lights. 4 LED backup lights and all required clearance lights. Sealed factory wiring harness. 7 way trailer connection.

Tie Downs: Stainless recessed d-rings in deck and stake pockets.

Side Racks: 4" flip down hinged side racks w/greasable hinges. Brackets for 2 X 4 lumber tailgate.

Special Features: Tapered rear corners and deep skirting on rear.

Fuel Filler: Black steel fuel bezel (Diesel w/DEF fluid requires second fuel bezel)

Mud Flaps: 19" X 24" rubber w/anti-spray grooves.

To ensure choosing the proper size bed for your truck, the following information should be known:

1. Cab to axle measurement (measure from back of cab to center of rear axle)
2. Rear tires measurement (measure outside to outside width of rear tires)
3. Frame rails (measure outside to outside of frame rails at rear of truck)
4. Year, make and model of truck
